➔ **Ctrl + W Key**
   Default Browser Key combintion to quit the game anytime.

Know your Enemies
Minions

Most active enemy. Minions will not hesitate to glide towards you at a high velocity. Be careful of their high speed attack. They are actually easy to aim and destroy once they have targeted you.

Know your Enemies
Spiders

Your slowest enemy. But do not underestimate them. They shoot gigantic missiles which have a tendency to follow you. Kill them as soon as possible to save yourself from chaos later.

Know your Enemies
Rockets

Don't even bother shooting them. Their body is made up of indestructible alien metal, shaped to give them an aerodynamic edge. They usually move in one direction only.
